Education

University of Michigan, College of Literature, Science, and the Arts — Ann Arbor, MI
B.S. in Data Science, Minor in Economics — *Aug 2023 – May 2027*

- Relevant Coursework: Database Systems, Statistical Computing, Probability and Statistics, Artificial Intelligence, Data Structures
- Leadership: Founder of Good Karma Engineering; led operations and delivery of 50+ 3D printed prosthetic devices across multiple countries
- Organizations: Michigan Sports Analytics Society; Engineering Business Group, Pi Kappa Alpha Fraternity

Technical Skills

Analytics: Python, SQL (MySQL), R, Statistical Analysis, Data Visualization, Excel/Google Sheets
Data & Automation: ETL Pipelines, Reporting Automation, Data Validation, Dashboard Development
Cloud & Tools: AWS, GCP, Tableau, Docker, Git, Jira, Streamlit, Plotly, DuckDB, PowerPoint
Programming & AI: C/C++, LLM Applications, Computer Vision, Machine Learning

Experience

Nano Ops — Boston, MA
AI Engineer — *Jun 2026 – Aug 2026*

- Built an AI-powered workflow using Python, LLMs, and image/SKU extraction, reducing listing time from ∼5 minutes to under 2 minutes and onboarding effort by ∼60%
- Analyzed supplier workflows and feedback, identifying growth bottlenecks that informed a pivot toward distributor surplus inventory
- Defined match rate, sell-through, and time-to-fill KPIs to track marketplace performance and prioritize product improvements

AfterQuery Experts — Ann Arbor, MI
Data Analyst — *Aug 2025 – Present*

- Built SQL and Python data pipelines processing 100K+ weekly user interaction records, reducing reporting turnaround by ∼30%
- Analyzed engagement and workflow drop-off, informing UX changes that increased task completion by ∼12% and reduced abandonment by ∼15%
- Built KPI dashboards and reporting tables, saving ∼8 hours weekly on manual tracking and improving engagement monitoring

Academic Analytics — New York, NY
Data Analyst — *Jun 2025 – Sep 2025*

- Analyzed $10B+ in institutional purchasing data using SQL and Python to identify vendor concentration and spending inefficiencies
- Identified ∼$1–2M in potential procurement savings through comparative spending analysis and vendor consolidation recommendations
- Automated dashboards and reporting workflows, reducing report-generation time by ∼40% and accelerating stakeholder insights

Personal Projects

SaaS Growth Analytics Dashboard | *Python, SQL, Tableau, Streamlit, DuckDB*

- Built a Streamlit analytics dashboard and prepared Tableau-ready datasets to track conversion, retention, churn, and MRR across 55K+ simulated user events
- Applied two-proportion z-tests to activation rates, identifying an 18–24 percentage-point gap between referral/organic and social acquisition channels ($p < 0.001$)

ReStock Verify: AI Listing-Verification API | *Python, FastAPI, Docker*

- Built a Python API transforming product images and SKUs into validated structured data using a vision LLM and deterministic risk-tiering logic
- Implemented an evaluation framework achieving 100% category and condition classification, with automated testing, CI, and containerized deployment
